PROFESSIONAL SUMMARY

Recent Master's graduate in Information Systems and Technology with strong technical support, systems administration, and troubleshooting skills. Experienced in Windows and Linux environments, database management, cloud technologies, and user support through academic and volunteer projects. Seeking an IT Support, Help Desk, or Technical Support position where I can apply my technical knowledge to assist users and maintain reliable IT systems.

TECHNICAL SKILLS

- Operating Systems: Windows 10/11, Linux (Ubuntu)
- Technical Support: Software installation and configuration, User account management, Technical troubleshooting, Hardware and software support, End-user training
- Databases: MySQL, PostgreSQL, MongoDB, Oracle
- Networking: Basic network configuration, TCP/IP fundamentals, Network troubleshooting, Connectivity support
- Cloud Technologies: Amazon Web Services (AWS), Microsoft Azure
- Programming: Python, Java, PHP, R
- Web Technologies: HTML, CSS, JavaScript, Flutter
- Tools: Git, Visual Studio Code, Tableau, MS Office Suite

PROFESSIONAL SKILLS

- Technical troubleshooting
- End-user support
- Customer service
- Problem solving
- Documentation and report preparation
- Time management
- Communication and teamwork

EDUCATION

Master's Degree in Information Systems and Technology
Nkumba University, Uganda
October 2025

Bachelor's Degree in Engineering Information Technology
University of N'Djamena, Chad
April 2023

LANGUAGES

- **French (Advanced)**
- **English (Advanced)**

PROJECTS & ACADEMIC EXPERIENCE

Master's Thesis Project (Feb.2024 - Sept.2025, Nkumba University, Kampala, Uganda)

- Conducted data collection, preprocessing, and analysis of medical image datasets.
- Designed and implemented a Capsule Network (CapsNet) model for automated COPD detection from chest X-ray images.
- Prepared technical documentation and research reports.
- Presented findings to academic supervisors and stakeholders.

Bachelor's Project (Sept.2021 - Aug.2022, University of N'Djamena, N'Djamena, Chad)

- Designed and developed a web application for managing journals and academic publications.
- Created and maintained database structures using MySQL.
- Supported testing, troubleshooting, and system improvements.
- Developed user interfaces using web technologies.

Enterprise Resource Planning (ERP) System Design

- Developed a prototype ERP solution using Java and MySQL.
- Designed database structures and system modules for finance, HR, and supply chain operations.
- Tested system functionality and resolved technical issues.

Data Analytics Dashboard

- Built a dashboard in Tableau to visualize student performance data, improving decision-making for faculty.

Cybersecurity Risk Assessment

- Performed security assessments on university information systems.
- Identified vulnerabilities affecting system security.
- Prepared technical reports detailing risks and mitigation recommendations.
- Assisted in improving system security awareness.

Cloud Migration Project

- Assisted with migration of student records to AWS cloud infrastructure.
- Supported data backup and recovery processes.
- Helped maintain secure access to digital records.
- Monitored data integrity and system accessibility.

VOLUNTEER & LEADERSHIP EXPERIENC

Volunteer IT Support | Local Community Center | 2024

- Installed and configured software applications on staff computers.
- Provided technical assistance and troubleshooting support for users.
- Assisted with network configuration and connectivity issues.
- Trained staff on Microsoft Office applications and basic computer operation.
- Resolved routine hardware and software problems to maintain productivity.

University Tech Club Member

- Participated in hackathons, coding competitions, and collaborative projects with peers.

Graduate Research Assistant (Academic Experience) | Nkumba University

- Managed research databases and digital records.
- Supported data collection, analysis, and reporting activities.
- Maintained accurate project documentation.
- Prepared presentations and technical reports.
- Coordinated communication among faculty and project participants.
